EDITION 13

Welcome to the 13th Edition of the BCE Buyers Guide.

Our Buyers Guide has always been the industry standard, introducing innovation and continuous improvement within our carefully selected ranges from leading global suppliers. This edition is no different with over 450 new items and the introduction of premium brands such as Cambro, Ocean and Efay.

This catalogue has been engineered to be more user friendly and allow customers to have a better sense of the ranges and products available. Start your journey from the back of house all the way to table top, illustrating that the Edition 13 is everything you will need in one place. We hope that you enjoy navigating and shopping from this catalogue as much as we have enjoyed crafting it for you.

ABOUT US

BCE Foodservice Equipment is Southern Africa's leading supplier of commercial kitchen equipment, appliances, utensils, buffetware, and tableware for the hospitality and foodservice industries. Established in 1987, BCE's roots are firmly grounded in Southern Africa. We have an extensive product range, with over 4500 products, comprising quality brands, sourced from reputable local and international suppliers such as Robot Coupe (vegetable preparation equipment), Churchill (crocery solutions), Hamilton Beach (commercial blenders) and Cambro (hospital care and storage).

BCE boasts over 60 leading brands, distributed exclusively through an expansive dealer network throughout Sub-Saharan Africa. With experience spanning 35 years, BCE has built a formidable operational capability to service its customers and is regarded as the best in the highly competitive foodservice equipment industry.

OUR TEAM

BCE is proud to have a committed, expertly trained, and experienced workforce that continuously strives to deliver a seamless experience. We pride ourselves on excellent service and offering skilled support to our customers. Our teams work efficiently and accurately to consistently deliver on our customer needs. Operations are coordinated and executed from our Johannesburg and Cape Town branches.

SERVICE

Our customers are our number one priority and we are committed to their success. We have developed a solid understanding of their expectations, and the industries within which they operate, through years of experience and relationship building. BCE's service is unrivaled in the industry. This is evident in our daily operations and customer feedback. We ensure availability of stock at any given time, with the best global brands that adhere to quality standards supported by an excellent sales and technical team.

BRANDS

Our products conform to global quality standards and adhere to regulations for the protection of health, safety and the environment. Our world-renowned brands such as DIHR (dishwashing systems), Bravilor Bonamat (coffee machines), Piron (commercial ovens), Brema (ice solutions) and Anvil (catering equipment) are from carefully selected suppliers and are consistent with industry innovations and best global practices.

SHOWROOM

Visit the BCE showroom in Johannesburg for an exciting experience. BCE boasts a state-of-the-art showroom and test kitchen, which is approximately 500sqm², and is one of a kind in the industry. Our magnificent showroom has been designed to provide a realistic representation of a typical food and beverage establishment and is stocked with solutions to cater to different customer needs. This unique experience has been replicated in our Cape Town branch. Our passionate and professional sales consultants are always willing to provide a detailed tour of the showrooms which showcase our products and will demonstrate their capabilities and assist with suitable solutions.

With over 4500 products, a breath-taking showroom, 24-72-hour delivery commitment, a skilled workforce and over 60 market leading brands – BCE is in a class of its own.

REFERENCESS

DIMENSIONS

When viewing the appliance from the front in its regular operating position, the width (W) of the product is the total distance from left to right; the depth (D) of the product is the total from front to back; and the height (H) is the total distance from the bottom of the product to the top. The three figures shown for rectangular type products are always given in the following order:

WIDTH (W) X DEPTH (D) X HEIGHT (H)

In the case of circular or cylindrical shaped products, the diameter and height of the product from top to bottom are shown. In the case of utensils, unless otherwise specified, the dimension given is the total length of the utensil.

PRODUCT DIMENSIONS

- All dimensions are given in millimeters (MM) or centimeters (CM).
- Please treat dimensions as approximate and subject to change. Detailed drawings can be supplied on request.
- All volume capacities are given in liters (L or LT) or milliliters (ML) and total capacities.
- 1 liter = 1000 milliliters

PRODUCT WEIGHTS

- These are given in kilograms (KG). To convert to pounds multiply by 2.2
- Please treat weights as approximate and subject to change.

ELECTRICAL PARAMETERS

Voltage is 220/230V single phase 50Hz AC, unless otherwise specified. Power is the total electrical output power in kilowatts (kW). This figure can be converted to give the equivalent horsepower value, by dividing it by 0.7461kW = 1.34hp.

PLEASE NOTE

- The products may differ slightly from the pictures shown in this buyers guide.
- Outputs and capacities given are generally the maximum possible and these figures do vary according to circumstances. They are based on measurements supplied by the manufacturer.
- Every effort has been made to include as much needed information as possible and to present it in an easy-to-read, unambiguous and consistent manner

FINDING YOUR WAY

You can refer to the index in each section, or turn to the applicable colour-coded category hosting the type of product, or look the product up in the alphabetical 'reference section', which will give the exact page number where the product can be found.

INDUCTION WARMER

What Is Induction?

Put simply, an induction-cooker element is a powerful, high-frequency electromagnet, with the electromagnetism generated by sophisticated electronics in the "element" below the unit's glass surface. When a good-sized piece of magnetic material such as, a S/Steel pot is placed in the magnetic field that the element is generating, the field transfers ("induces") energy into that metal. That transferred energy causes the metal (S/Steel pot) to become hot. By controlling the strength of the electromagnetic field, we can control the amount of heat being generated in the cooking vessel and we can change that amount instantaneously.

Please note that all of our S/Steel Infinity and Global pots and sauce-pans are Induction friendly

- Warmer must only be used in buffet heating application, must not be used for cooking
- Warmer is not for heating up water in chafing dish.
- Water must be pre-heated before being poured into water pan
- Water must be kept below 90°C, to keep food warm

AUTOMATIC - BEAN TO CUP

The Bravilor Bonamat Bean to cup is a fully automatic espresso machine. It uses freshly ground beans to prepare all its coffee specialities. The machine is available in 2 models, namely the Esprecious 12 and Esprecious 11L [with FreshMilk].

The Esprecious 11L is supplied complete with the FreshMilk. The FreshMilk has been specially designed for the Esprecious espresso machine. The Bravilor Bonamat cooling system keeps the milk at a constant 4 degrees. The milk frother inside the Esprecious creates a milk foam as light as air. The whipping process of fresh cold milk, steam and air creates milk foam of superb quality. A major advantage of the FreshMilk is that it is controlled by the Esprecious touchscreen. Daily cleaning and rinsing activities are selected via the touchscreen, with visual and acoustic feedback.

FEATURES

- Ease of use: intuitive touchscreen
- Double dispensing outlet for serving two cups simultaneously
- Automatic rinsing program to optimise the in-cup quality
- Separate hot water outlet for e.g. tea
- Unique hot water system to reduce scaling, reduces the maintenance requirement

BACK BAR COOLERS

Salvadore will be using a new, more environmentally friendly insulation material, called cyclopentane, in the manufacture of select units. Cyclopentane is a blowing agent for the polyurethane foams that are used to insulate refrigerators and freezers. Unlike other chemicals used to insulate refrigerators, cyclopentane does not contain hydro-fluorocarbons (HFCs). Using cyclopentane results in significant reductions in equivalent CO2 emissions.

FEATURES

- Roll-bond evaporator system with fan assisted cooling
- Automatic compressor cycle defrost
- Foaming agent cyclopentane (40MM per side)
- Digital thermostat
- Self closing door
- Adjustable shelves
- Toughened safety tempered glass
- Lock fitted as standard
- Adjustable feet

PLANETARY MIXERS

WHAT SETS THE KITCHENAID MIXER APART FROM DOMESTIC MIXERS?

- Professional mixer designed for commercial use
- All metal construction
- Driven by gears, not a belt - therefore maintains constant speed even when large quantities are added to the bowl
- Machine has chip and stain resistant finish
- Uses a lift system i.e. mixer's head does not tilt, promoting mixer stability

A must for any professional kitchen: reliable, quiet and durable with unsurpassed performance. Comes standard with S/Steel mixing bowl, whisk, dough hook and beater attachment.

SMALL SIZE, GREAT PERFORMANCE! The RX101E compact dishwasher has been designed to satisfy the demand of commercial kitchens. These machines combine compact dimensions with high performance.

FEATURES

- Self-cleaning vertical wash pumps, protected from electrical overloads
- Traction system with built-in clutch preventing derailment
- AISI 304 S/Steel boilers fully insulated to reduce thermal losses
- Electronic soft touch panel with IP65 security level, manufactured to be user friendly and easy to be cleaned
- S/Steel washing and rinsing arms. These are removable without using any tool, for easier cleaning operation or to help the change of working direction on the RX101E
- S/Steel surface filters on every tank, easily removable without detaching washing arms
- Insulated double skin door, counterbalanced, equipped with anti-drop safety system
- Auto timer in order to switch off the rack conveyor motor after a prolonged period of inactivity
- Economizers to allow operation only when the rack is detected on that specific area, avoiding any waste of water and energy

WHAT FUSION OFFERS OVER CONVENTIONAL NON-STICKS?

- It is totally free of any PTFE and PFOA
- Because it is ceramic, Fusion can be taken to extreme temperatures [455°C]
- It is waterborne (many conventional non-sticks use contaminating solvents)
- It cures at a lower temperature, using less energy and saving money

USE AND CARE OF ALUMINIUM

- Cool before washing or soaking to prevent warping and accidental burns in handling.
- Wash after each use and dry immediately to preserve appearance.
- Always add salt to the boiling liquid and stir until dissolved. Undissolved salt should not remain on aluminium surface as this may cause pitting.
- Do not allow acidic or salty food to remain in aluminium for long periods of time as this may also cause pitting and discolouration.
- Minerals in water and foods may stain aluminium. Automatic dish washing may increase the staining when the high heat in the drying cycle combines with the minerals and chemicals in water. Hand washing is therefore recommended to preserve the attractive finish of aluminium cook ware.
- To remove burnt food fill the pan with water to cover and simmer over low heat until particles loosen, occasionally scraping burnt particles with a wooden spoon. After simmering, scour, wash normally, rinse in hot water and dry immediately.
- Stains and discolouration can be removed by boiling a solution of 2 to 3 tablespoons of cream of tartar, lemon juice or vinegar to each litre of water for 5 - 10 minutes. then lightly scour with a soap filled scouring pad.
- Cooking acidic food such as tomatoes or rhubarb will remove the stains naturally without affecting the cooked food product.
- To remove stains from an aluminium exterior use a non abrasive cleaner.
- Use wood, plastic or smooth edged metal utensils. Sharp edged tools such as knives and beaters may scratch the aluminium.

USE AND CARE OF BLUE STEEL

When used for the first time, the blue steel pan should be washed with hot water and liquid soap, rinsed and dried properly. Heat the pan and once it is hot, put a little oil or fat together with onions, bread and vegetable peels into it for a few minutes. Throw these ingredients away and wash the pan in hot water and dry. If you do not use it immediately, lightly oil the cooking surface and store it away.

FEATURES

- Medium duty blue steel between 1 and 1.5MM thick
- For less powerful heat sources
- Quick heating time
- Extra strong handles

PANS

FEATURES

- This Lyonnaise profile pan made from 2MM (14 gauge) blue steel plate gives very good heat distribution. Great for searing, frying, stir-frying and sautéing
- Lyon-shaped with high sides and curved skirt to easily flip and turn the food
- Perfect heat conduction
- Strip steel handle is firmly riveted
- Non-stick surface can be obtained when seasoned and cured correctly the more you use and appropriately maintain it, the slicker the surface will become
- For all heat sources (induction only with moderate temperatures)

FEATURES

- Perfect for open flame
- Non stick coating

WHAT MAKES A GOOD KNIFE?

- Sharpness - Most important is how well its blade will take and hold an edge
- Durability - A good knife will stand up to generations of daily use without undue wear or deterioration
- Hygiene - Materials and construction details of the handle should minimise crevices that offer hospitality to bacteria

WHY COLOUR CODE YOUR KITCHEN?

Prevent cross contamination between different areas in the kitchen or different food types

WHISK AND MOULDS

Less work, faster results! Three times the aeration with one rotation!

The inner flexible core moves as you whisk, whipping the mixture continuously. The wires also have the right amount of flexibility to maximize air incorporation, whilst standing up to thicker batters effortlessly. All wires are hygienically sealed for rapid whisk.

RUSTIC INSPIRATION WOOD RANGE

A range that delivers style and individuality

The New "Rustic Inspiration" wood range from Infiniti has an exciting table top personality that delivers style and individuality. A contemporary collection of Kiaat wood boards, risers, baskets and stands, driven by the changing trends in food presentation, to create a unique buffet solution.

WHAT IS KIAAT

Kiaat is commonly found in Central and Southern Africa, and is well known in SA. It is also known as "Mukwa, umbila, loedhout" or Wild Teak. Kiaat, is a hardwood, appealing to the eye as it is a beautiful brown filtered with streaks of white and highlighted with flames of red and orange that enhances the colour of the product.

Kiaat is durable and food safe, has a spicy fragrance and is insect resistant. This wood has great stability and it keeps its shape very well.

Not to be submerged in or exposed to excessive amounts of water, clean with damp cloth only rinse and dry in warm area.

RAKU

Inspired by the traditional glazing process known as Raku firing which creates expressive and exciting results, Raku showcases reactive texture through print. Raku inspired prints are achieved with Churchill's innovative print process. Each piece is unique as the reactive print acquires its beautiful colour through random, spontaneous effects. Emulating an artisan glaze finish, Studio Prints Raku has all of the durability and technical reassurance required for the hospitality environment.

CUTLERY

We offer a range of the finest cutlery shapes, from simple to ornate, traditional to contemporary, along with speciality items such as serving gear and steak knives in either 18/0 or 18/10 S/Steel.

18/10 S/Steel contains 18% chrome and 10% nickel. Therefore 18/10 provides great protection against corrosion, scratching and assists with longer lasting brilliance and shine.

PINTINOX

Superior cutlery products made in Italy since 1929. Specifically made with quality S/Steel intended for modern catering.

GLASSWARE

A wide offering of quality glassware specifically designed for the food service industry.
From lead-free crystal glass to stemware and speciality cocktail glasses.

Our products are sourced from reputable manufacturers and are suited for any occasion whether formal or casual.

"Elegant and practical glassware for every day use"

Bormioli Rocco uses the finest natural resources to create superior glass for homes and businesses around the world. The range has been specifically designed for use in the catering industry in accordance with the most advanced manufacturing techniques.

- Our Crystal Range is made from superior lead-free crystal glass and encompasses strength, clarity, shine and innovation.
- The Standard Range is comprehensive and its versatile shapes are designed with emphasis on functionality and practicality.
- The Toughened Range is unsurpassed in strength and functionality. The manufacturing process employed renders it safer than ordinary glass and, in addition, tempered glass is also 2.5 times more resilient to thermal shock than ordinary glass.

A - LASER CUTTING

For thin rims that enhance the perception of wine qualities and elevate the tasting experience.

B - REDUCED THICKNESS

Excellent distribution of glass around the rim and along the sides.

C - STAR GLASS

Bormioli Rocco's innovative and exclusive chemical composition that produces an ultra-clear, highly transparent lead-free crystal glass.

D - PULLED STEM

A particular process whereby the stem is pulled from the same gob of molten glass as the bowl ensures elegant shapes, ultra-high strength and flexibility.

E - XLT

The exclusive reinforcing treatment that strengthens the stem and protects it over time.

STACKABILITY

Space saver shapes designed to economise on storage and transport.

TEMPERED GLASS

High resistance to thermal shock, impact and machine washing cycles. The exclusive reinforcing treatment that strengthens the stem and protects it over time.

TABLEWARE

DESIRE

Award winning design. Every single glass is uncompromisingly clear and brilliant. Aerlumer - the bottom curl lines at the bowl makes for unprecedented appreciation experiences.

UNIVERSAL
1LS10US15 - 42CL
220 X 88MM (24)

RICH WHITE
1LS10RW17 - 48.5CL
216 X 96MM (24)

ELEGANT RED
1LS10ER21 - 59CL
220 X 110MM (24)

Aerlumer encourages micro-oxidation and softens the wine while swirling. It allows diversified interaction between wine and air, intentionally subtle to avoid effects when discovering colours of wines

CLEANING AND MAINTENANCE

PLACEMATS

CLEANING

Placemats are easily cleaned with soap and water. Should a stubborn stain occur, the woven polyvinyl can withstand gentle rubbing with hot soapy water or a bleach-based detergent.

SANITIZING

A high temperature sanitizer can be used once a week to ensure that the placemats remain hygienic. This product cannot be ironed since it is made of vinyl.

DISHWASHERS

Do not put placemats into the dishwasher.

STORAGE

Store placemats flat or neatly rolled up. Do not allow them to be folded or allow them to crease.

CROCKERY

DETERGENTS

Choosing the correct detergent is important. High alkaline content will eventually damage the glaze surface. Always follow the manufacturer's instructions and do not use more than the recommended quantities.

ROTATION

Rotating the tableware in use promotes even wear and tear. Ensure that there is enough stock in operation to prevent excessive use and premature deterioration.

TEMPERATURE

A wash temperature of 60°C is generally optimal for achieving the correct balance between ensuring the effective removal of food particles and maximizing the longevity of the glaze. Dishwashers Avoid any vibration of plates against each other through proper loading and through the use of plastic coated racks and baskets. Ensure that the manufacturer's instructions are followed. Wash cutlery in separate baskets to prevent metal markings on the crockery.

MICROWAVES

Ceramic tableware with metallic decorations such as gold or silver are not suitable for microwave ovens.

THERMAL SHOCK

Ceramic tableware is not designed to withstand excessive thermal shock conditions e.g. from the freezer to the hot oven. Do not expose tableware to a naked flame or heated electric element.

HANDLING

Do not use metal utensils, scrapers, abrasive pads and powders or bleach for removing food particles. Only borax or gentle, non-abrasive household cleaners should be used to remove stains. Metal markings can be avoided by placing tableware on plastic or rubber mats.

CUTLERY

CLEANING

Wash cutlery in hot soapy water as soon as possible after use. Rinse immediately with hot water and wipe cutlery with a dry, clean cloth immediately. Never leave dirty cutlery to soak and never leave cutlery damp, especially 18/0 S/Steel grade.

DISHWASHERS

Do not mix stainless steel or silver plate in the same load. Ensure that the manufacturer's instructions are followed and do not allow cutlery to stand in the dishwasher after the cycle is completed. Cutlery must be dried with a clean cloth.

DETERGENTS

Use only pH neutral or slightly alkaline detergents. Don't use products containing hypochlorides (bleach) or silver dip. Always follow the manufacturer's instructions and do not use more than the recommended quantities.

POLISHING

Stainless steel cutlery will perform better if it is polished from time to time with a recommended stainless steel polish.

CLEANING AND MAINTENANCE

GLASSWARE

CLEANING

Glassware should be cleaned immediately after use to avoid stubborn residues. Wash glassware in hot water and rinse with cold water. Crystal glass should be washed in lukewarm water. Scrub glassware thoroughly with a brush ensuring that all surfaces are covered. Do not use any harsh cleaning utensils such as a steel wool pad to wash glassware as this will cause scratches.

DETERGENTS

For stubborn stains, use a mild detergent only. Always follow the manufacturer's instructions and do not use more than the recommended quantities. After using a detergent, ensure that glassware is rinsed thoroughly to avoid any detergent residues being left on the glass.

DISHWASHERS

Glassware can be washed in the dishwasher. However, take care not to wash glasses with very delicate long stems in the dishwasher as the possibility exists that these may break.

ROTATION

Avoid using scratched, cracked or chipped glasses.

STACKING

Avoid stacking glassware unless it is specifically identified as stackable. For best results store glasses in appropriate crates.

THERMAL SHOCK

Do not expose glassware to an open element or electric plate and do not place in the oven. Normal glass can withstand temperature changes of 42°C, and tempered glass can withstand temperature changes of 130°C.

MICROWAVES

Never allow glassware to be placed inside a microwave oven.

SALT AND PEPPER MILLS

Don't mill directly over open saucepans, casseroles or frying pans during cooking. The steam can dampen the salt and pepper which in turn can clog the mechanism.

CLEANING

Do not put your mills in the dishwasher. Clean the body of the mills with a soft, dry cloth. Never immerse the mill in water as will cause rust to appear underneath/inside the unit, but can also lead to paint cracking and swelling in the case of wooden units. Clean the insides of the mill with a small brush.

MAINTENANCE

Don't over-tighten the nut when you refill or adjust the grind. If you don't intend to use the mill for an extended period of time, remove the peppercorns or salt. When you get your mill, and once in a while after that, place a drop of mineral oil on top nut. Wood body mills will benefit from the occasional application of mineral or vegetable oil to enhance the appearance and prevent the wood from drying out. In cases, that the mechanism is not working properly, it is caused by the replacement salt crystals or pepper corns being much too big for the mechanism to handle i.e. no grinding takes place as there is no traction.

REFILL

Remove the knob and top to fill, then replace them both. Turn the mill upside down to get any seasoning out of the mechanism, and then turn the top nut clockwise to tighten loosely. It is very important to replace with similar sizing to what was originally in the mill i.e. medium to small salt crystals or peppercorns etc. Don't use wet or moisture-rich salt crystals Don't ever use salt in your pepper mill or peppercorn in a salt mill as it may well corrode the mechanism or other spices or herbs either.

STORAGE

Store your mills in a cool, dry place where they are unlikely to be knocked to the floor and get damaged. Storage over an area used for cooking is more likely to lead to a clogging up of the mill especially the salt mill as condensation may get into the seasoning material.
